TODAY & TOMORROW

JANUARY 5-18, 1985

ADDRESS CORRECTION REQUESTED **RUSH — TIME DATED**

A stop smoking program that includes husbands, wives or partners, began this month for a four to five week period.

"We are trying to find out if partner participation is beneficial in quitting," said Dorothy Ginsberg, PhD, assistant research psychologist and director of the program, sponsored by the Department of Psychiatry.

Participants will receive educational material, skill training and professional assistance from the UCSF staff both in quitting and in maintaining progress. The program, said Ginsberg, is for people who have a sincere desire to give up smoking and who currently are living with an intimate partner. The partner can be a non-smoker, ex-smoker or current smoker.

Meetings will be held once or twice a week during the day or early evening at UCSF. After the initial four to five weeks, follow-up meetings will be held at three and six months. A $20 refundable deposit is required.

The treatment program is funded by the American Cancer Society and is an outgrowth of the UCSF Habit Abatement Program.

For further information call Ginsberg at x77-574.

The UCSF Dental Hygiene Program has extended its 1985 application deadline to Thursday, January 31.

Students interested in applying should have a minimum of two full years of college level education including:

- one year of English composition and literature;
- one-half year each of inorganic chemistry and organic chemistry, both with laboratory work;
- one year of general biology/zoology, with laboratory work;
- two psychology courses;
- a speech class and a sociology class.

For further information and application forms call x2737 or write the Dental Admissions Office, Room S 619, UCSF, 94143.

The next campus blood drive is scheduled for Monday, January 28. Blood donation sites are the main lounge of Millberry Union from 8 a.m. to 3 p.m. and the mezzanine level of the School of Nursing building from 11 a.m. to 5:30 p.m. Donors are asked to bring personal ID. Appointments are not necessary but can be made in advance by calling x4013.

Two $35 gift certificates for the Washington Square Bar & Grill again will be raffled after the drive. The gift certificates are donated by the restaurant and the Associated Students of UCSF. To be eligible for the drawing, donors should place their receipts in the boxes provided. UCSF pediatric resident Michael Schreiber, MD, and Sunset District resident Lisa Fink were winners of the October 8 blood drive raffle.

The alumni associations of the schools of Dentistry and Pharmacy will again stage contests with cash prizes going to the classes that donate the most blood during the drive. The results of the last blood drive contest were: first place, School of Dentistry and School of Pharmacy first year classes; second place, Dental II and Pharmacy II; third place, Dental III and Pharmacy III.

Campus blood drives are sponsored by the Irwin Memorial Blood Bank of the SF Medical Society and coordinated by the Campus Tours/Speakers Bureau. For further information call x4394.

DEADLINE

Deadline for the next issue of *Today & Tomorrow*, covering the time period Jan. 19-Feb. 1, will be **Tuesday, Jan. 8, 11 a.m.** Please send your copy to Allen Balderson, News & Public Information Services, 532 Parnassus Ave., Rm. 300, x1541 or x2557.

Infection Control Workshop. N 721. Jan. 17.

UCSF and Mount Zion have signed an agreement committing the two institutions to a lasting interdependent relationship in patient care programs and services, in education and in research, it was announced by Tully M. Friedman, chair of the board of Mount Zion, and UCSF Chancellor Julius R. Krevans, MD.

Under the agreement, a Joint Program and Planning Board, composed of six representatives of the leadership of each institution, will spend the next six months working out a "strategic plan" to accomplish consolidation and coordination of program and resources for the benefit of the communities they serve.

Programs will be built upon the strengths of both institutions, while assuring that the separate identity of each is maintained, they emphasized.

The signed agreement declares that the goals of the strategic plan will be for the "optimal utilization of the combined resources of the two institutions, including the future use of facilities," and declares that the plan will be predicated upon the "unique qualities of both organizations and the patients they serve."

The objectives of the Strategic Plan, the agreement states, will be:

- To plan the consolidation of clinical activities, at the appropriate physical location, that will benefit the community and remain consistent with the educational mission of both institutions. Such planning shall take into account the efficiency and effectiveness of the consolidated services and shall insure the continued maintenance of high quality patient care, responsiveness to community need and educational objectives.
- To develop a plan for coordinated services, new programs and joint health care ventures.
- To create a novel and unique relationship between a voluntary community hospital and UCSF by establishing

(continued on inside)

Mayor Dianne Feinstein has recommended David Werdegar, MD, MPH, as interim Public Health Director to the new Health Commission convening January 15. The appointment is for six months while the mayor makes a permanent selection for San Francisco's top health officer.

Werdegar is associate dean for the UCSF School of Medicine at San Francisco General Hospital, and was among the officials most actively involved in restoring the hospital's medical standards after a critical State report threatened the loss of its accreditation early last year.

Professor and chair of the Division of Family and Community Medicine since 1981, Werdegar previously served as associate dean for the UCSF Fresno Medical Education Program from 1976 to 1981.

A member of the UCSF faculty for some 20 years, Werdegar has had a long-standing interest in primary care and the relationships of health care to family and community. He developed the home care service at Moffitt Hospital, one of the few university hospital-based programs of its kind, which provides students with an opportunity to see patients in the context of home environment and family. Werdegar also was involved in the establishment of early nurse-practioner programs at UCSF and helped to develop a concurrent MD and MPH degree program with the UC-Berkeley School of Public Health.

A scientific seminar on cell analysis techniques will be held on Tuesday, January 15, as part of a joint dedication of new instruments by the Laboratory for Cell Analysis at the Center for Educational Development (CED), 1855 Folsom Street, and the NIH Division of Research Resources (DRR), which provided the funds for the equipment. The formal dedication will be held from 1:30 to 2 p.m. in CED, Room 230, followed by a discussion by four scientists on some of the ways in which the laboratory's instruments are used in research here. (See inside calendar for full program.)

NEWS BRIEFS

(UCSF-Mount Zion continued)

Mount Zion, along with SFGH, the VAMC and UCSF Hospitals and Clinics, as an integral part of a network for patient care, education and research.

During the six months, Friedman and Krevans emphasized, the interests of all groups within the two institutions—patients, physicians, administration, and various constituencies—will be considered in the planning process.

Mount Zion and UCSF have had a close relationship for many years, including joint teaching programs for residents and medical students in selected areas and a number of joint research projects. Many of the members of the Mount Zion medical staff also are on the clinical faculty at UCSF.

The closer relationship called for under the new agreement, Friedman and Krevans explained, is a direct response to the changing health care environment in a city where the number of physicians in practice and the number of acute care hospital beds exceed the need for both, and where health care cost containment has become an urgent priority.

"Consolidation and coordination of patient programs and services," Friedman and Krevans declared, "means we will be able to build on the strengths of the two institutions. It will give us a critical mass in talent and facilities that will make it possible for us, together, to become more innovative, more flexible, and more responsive to the health care needs of our communities over the next decade than either one of us could be alone."

The agreement identified five major objectives to be implemented:

- To establish a Joint Foundation for the support of education, research and community service.
- To integrate administrative and support functions wherever possible between UCSF Hospitals and Clinics and Mount Zion.
- To integrate graduate medical education activities, so that all programs that remain at Mount Zion are under the aegis of the UCSF School of Medicine.
- To establish a position of associate dean of the UCSF School of Medicine at Mount Zion.
- To develop a mechanism for joint appointment of the associate dean and all department chiefs at Mount Zion who shall qualify for, and receive, faculty appointments in the UCSF School of Medicine.

The Joint Program and Planning Board expects to present a specific proposal to both institutions' constituencies by June 30, 1985.

Major Hospital Administration offices have been completed on the ground floor level, Room 103, of Long Hospital resulting in the move of several administrative staff and their assistants. The main telephone number of 1401 and mailing address of M 181 for Hospital Administration remain the same.

Now located in Long 103 are: Director William B. Kerr (x1405); associate directors Dennis Brimhall (x2316), Jacqueline Kuhn (x3006), Helen Ripple (x3162) and Ronald Schumacher (x2230); deputy associate directors Anthony Wagner (x4844), Margaret Bryan (x4823) and Ronald Lipsy (x3140, Lipsy to relocate after January 1); Assistant Director of Nursing Marilyn Flood (x2252) and Assistant to the Director of Finance Susan Semonoff (x3013).

Relocated to Moffitt 167 are assistant directors Karen Akerson (x4855), Daniel Shydler and Victor Yick (both x4855).

The former Moffitt Hospital administrative suite soon will be refurbished and the Ambulatory Care Center Surgery Unit soon will be constructed. A major refurbishing also is planned for Moffitt lobby beginning in the spring.

If you are a faculty member and confused about the different retirement and benefit programs the University offers, the following information might be helpful.

UC has just begun a new program to supplement the advisory and counseling programs currently provided by the benefits section of the Personnel Office. UCSF has been designated as the first of the nine UC campuses to evaluate the effectiveness of this supplementary program.

Beginning January 7, on Mondays and Tuesdays from 10 a.m. to 2 p.m., representatives from the President's Office Benefits Programs Department will be available by appointment to discuss personal retirement or benefit questions with individual faculty.

Marvin Siperstein, chair of the UCSF Committee on University Welfare, suggests that for the first month or two of this experimental program, new faculty members only should make appointments.

The benefits representatives' office will be located in Room 100 of the Laundry Storehouse building. To make an appointment faculty should call Susan Descalso at x1400.

I. Charles Kaufman, MD, a world leader in the study of how bereavement affects health, has won the 21st annual J. Elliott Royer Award and its $15,000 cash prize.

UCSF professor and vice chair of the Department of Psychiatry and chief of the psychiatric service at the VAMC, Kaufman was honored for decades of pioneering research on anxiety, depression, and their role in physical illness, as well as for his administrative contributions at the VAMC.

Kaufman's interest in bereavement grew after he spent a year in 1958 at Cambridge University in England, working with ethologists—biologists who study animal behavior. After his return to the US, he began a series of historic experiments at the SUNY Downstate Medical Center where he was the first researcher to study behavior of primates in groups instead of alone in cages.

Kaufman's work at UCSF began in 1979 when he started a clinical study on physiological changes in depressed humans.

At the VAMC with colleague Craig Van Dyke, MD, Kaufman is comparing several groups, including bereaved wives of VAMC terminally ill patients, wives of men undergoing major surgery, depressed women at LPPI who have had no bereavement recently, and a control group who show no signs of stress, depression or bereavement.

The Royer Award was established by the UC Regents in memory of the late Oakland physician, who left an endowment to honor achievement in psychiatry or neurology.

Jorma K. Miettinen of the University of Helsinki will give the first in a series of lectures sponsored by UC's Institute on Global Conflict and Cooperation.

Miettinen, professor of radiochemistry, will speak on Thursday, January 31, from 3 to 4:30 p.m. in HSW 301. His topic will be "A Finnish View of the East-West Crisis." A reception will follow the lecture at the Faculty/Alumni House.

He also will lead a Brown Bag Seminar on chemical warfare on Friday, February 1, from noon to 1:30 p.m. at the Institute for Health Policy Studies, 1326 Third Avenue.

Miettinen, who served as an infantry officer in the two Finnish wars with the Soviet Union in the early 1940s, and is now a frequent Finnish government advisor to the UN, will provide a unique historical perspective on the confrontation between the Soviet Union and the US and its NATO allies.

A talk on "The Plight of the Elderly Poor in an Urban Ghetto" will be presented by Meredith Minkler, DPH, at the Faculty Wives meeting on Wednesday, February 6, at 10:30 a.m. at the Faculty/Alumni House. Minkler is an associate professor of health education at the School of Public Health, UC-Berkeley. Lunch will follow the program. For further information call Marjorie Campagna-Pinto at 921-6646.

HONORS & AWARDS

Barbara McLain, assistant clinical professor, family health care nursing, School of Nursing: The only nurse invited to speak at the 10th International Seminar of the Life Planning Center in Tokyo, Japan, Aug. 31-Sept. 1, and the Primary Care Association, Kyoto, Sept. 3.

Gretchen A.W. Gooding, associate professor, radiology; assistant chief, radiology service, VAMC: Elected president of the American Association of Women Radiologists at the annual meeting in Washington DC, Nov. 27.

David J. Sanchez, Jr., associate professor, family & community medicine: Appointed to the editorial board of the new international journal, *Mexican Studies/Estudios Mexicanos,* published by UC Press; elected to the Board of Trustees, Pacific Graduate School of Psychology.

William Hall, police officer, Campus Police Department: Named the UCSF Police Department's Officer of the Year in recognition of exemplary work performance throughout 1984.

William Posada, personal safety officer, Campus Police Department: Named UCSF's Campus Police Civilian of the Year.

Adele Clarke, doctoral candidate, sociology: Received a 1984 Rockefeller University research grant for "The Reorganization of Reproductive Biology, 1880-1940;" cited for honorable mention in the national competition sponsored by Pergamon Press and the National Women's Studies Association for her dissertation research "The Emergence & Coalescence of the Reproductive Research Enterprise, 1900-1940: Biological, Medical & Agricultural Work in the United States."

Nancy Stotts, assistant clinical professor & program coordinator, adult nursing in physiological nursing, School of Nursing: Appointed to the American Associates of Critical Care Nurses Research Committee.

Jacqueline Ventura, assistant professor, family health care nursing, School of Nursing: Designated an American Nurse Foundation scholar.

David E. Smith, associate clinical professor, pharmacology: Received the California Association of State Drug Abuse Coordinators Drug Abuse Treatment Award, 1983 & the National Association of State Alcohol & Drug Abuse Coordinators Drug Abuse Treatment Award, 1984.

Steven A. Schroeder, professor, medicine & Institute Health Policy Studies; chair, general internal medicine: Elected to the National Board of Directors for the Alpha Omega Alpha Honor Medical Society for a three-year term.

APPOINTMENTS

Jane S. Norbeck: Appointed chair, Department of Mental Health & Community Nursing, School of Nursing. Associate professor since 1983 and acting chair of the department since July 1984, Norbeck, who has just been appointed a fellow in the American Academy of Nursing, also serves as assistant director of Nursing Services at UC-Davis. She has conducted several studies and developed programs in the area of social support. The Norbeck Social Support Questionnaire, developed in 1980, now is being used by some 150 investigators in nursing and other health sciences around the world.

PUBLICATIONS

Martin G. Cogan, assistant professor, medicine; **Marvin R. Garovay,** director, Immunogenetics & Transplant Laboratory; associate professor, surgery: Editors, *Introduction to Dialysis* (Churchill Livingstone, NY, 1985). Other UCSF contributors are **Frank A. Gotch, Patricia Schoenfeld, William C. Krupski, Ronald L. Webb, David J. Effeney, Margaret Devney-Bruks, Donald P. Alexander, John G. Gambertoglio, Donald E. Potter.**

Mindy Fullilove, assistant clinical professor, psychiatry: Elected president, Northern California Black Women Physicians.

Robert D. Gibson, associate vice chancellor, student academic affairs & registrar: Awarded an honorary Doctor of Science in Pharmacy degree at the Massachusetts College of Pharmacy & Allied Health Sciences.

Margaret Kohan, assistant clinical professor; **Patricia Pothier,** professor; **Jane Norbeck,** associate professor & chair, all mental health & community nursing, School of Nursing: Received the Biomedical Research Support Grant Award from LPPI for their work entitled "Child Sexual Abuse: Incidence & Care Issues."

IN MEMORIAM

Alison Berry Evans. An instructor in the Department of Anatomy from 1967 to 1976, she became a medical student here in 1972 and continued to teach anatomy until she graduated in 1976. Through the years she received numerous teaching awards, including the prestigious Kaiser Award for her outstanding contribution to medical education. The Alison Berry Evans Memorial Scholarship fund for medical students has been established in her memory. Donations may be mailed to the Dean's Office, School of Medicine, Rm. S 224, UCSF, 94143.

Rosamond Magdalen Michael. She came to UCSF in 1961 as senior typist clerk at the Hooper Foundation. She left the University for two years and returned in 1967 as a senior typist clerk in the Department of Pathology where she was promoted to editor in 1968 and senior editor in 1975.

The UCSF Library is sponsoring an all-day seminar on Saturday, February 2, to teach the basic techniques for searching medline on the National Library of Medicine's Medlars System.

The seminar is open to UCSF practitioners, educators, researchers and students in the health care field and will consist of an eight-hour lecture/discussion followed one week later by an optional two-hour online practice session.

Completion of the basic eight-hour session will enable the participant to apply for an individual access code from the National Library of Medicine. This is not a course for those who intend to perform medline searches for others.

The seminar is $95. Applications are available at the Library reference desk, Room S 172. A second medline seminar will be held on Saturday, April 20. For further information contact Carol Yates-Imah or Elisabeth Bell, x2334.

The General Tumor Registry in the Cancer Research Institute has been awarded a five-year $1,552,000 contract from the National Cancer Institute to continue work as the quality control and training arm of the NCI's SEER (Surveillance, Epidemiology and End Results) Program.

The SEER Program, on whose findings the NCI bases its national estimates of cancer incidence and survival, is a reporting system providing total coverage of six states—Connecticut, Hawaii, Iowa, New Jersey, New Mexico and Utah—and four major metropolitan areas—Atlanta, Detroit, San Francisco and Seattle—plus Puerto Rico.

The General Tumor Registry has been with the SEER Program for some 10 years with epidemiologist/pathologist Calvin Zippin, ScD, of the CRI, serving as the principal investigator.

Nine Department of Radiology faculty members were honored at a reception on December 4 for 20 years or more of service to the campus. Dean Rudi Schmid and Hospital Director William Kerr presented plaques to Alexander R. Margulis, professor and chair (21 years); Reynold F. Brown, clinical professor (32 years); Erik Carlsson, professor and chief of cardiac radiology (20 years); Ralph R. Cavalieri, chief of VAMC Nuclear Medicine Service (20 years); Walter Coulson, clinical professor and former head of radiology at SFGH (27 years); Thomas H. Newton, professor and chief of neuroradiology (25 years); Charles D. Noonan, professor at the VAMC (25 years); Alphonse J. Palubinskas, professor and chief of uroradiology (25 years); and Steven E. Ross, clinical professor and director of the Radiology Learning Center (21 years).
